CACI NETWORK SERVICES

CLOUD INFRASTRUCTURE DESIGN, DEPLOYMENT AND MANAGEMENT

DATASHEET

END-TO-END CLOUD INFRASTRUCTURE EXPERTISE

The growth of cloud-based services shows no signs of slowing. From improved cost efficiency and rapid scalability, to high availablity and security, countless organisations around the world are reaping the benefits of services in the cloud.

But cloud infrastructure can be highly complex, and it's difficult to find the right skills and resources – or to know which aspects to prioritise. Add to this security concerns and migration of existing services, and executing a well-considered cloud strategy can be almost impossible without the right partner.

At CACI Network Services, we have a rich history of providing highly skilled professionals to help our customers get the most out of their cloud strategy.

Whether it's providing cloud services across private, hybrid or public environments, delivering strategy and design support tailored to your exact needs, or even assessing your existing cloud architecture, we're well placed to help you at each stage of your journey.

Services we perform for our customers include:

- Comprehensive onboarding, installation and configuration
- Cloud adoption readiness, migration, optimisation and support
- In-depth testing and validation
- Unlimited 24/7 technical support
- Operating system, security, and VDC network management
- Secure uk-based datacentre cloud hosting

KEY FEATURES

- We can help you shift from capex to opex, helping ensure your services are deployed in the most cost-effective way
- We have a team of highly qualified staff, experienced in all aspects of cloud infrastructure – from technical project management to architecture and engineering
- We can offer delivery assurance, including scalable resources to speed up deployment on your terms
- We ensure that every detail – no matter how small – is completely addressed

KEY BENEFITS

- We work with customers from a wide range of sectors, across on-premises and cloud environments.
- We have an experienced team of highly skilled network engineers and cloud architects who are dedicated to ensuring your cloud infrastructure is the best it can be.
- We can help you achieve significant cost savings by moving to the cloud and optimising your environments – including reducing your Capex spending.
- We are dedicated to complete transparency at every stage, only offering impartial advice that's in your best interest.
- We give you full ownership over your cloud infrastructure from the off – helping ensure your data is fully compliant and secure.
- We can add additional skills to your organisation either through our team of experts or our dedicated in-depth training.
- We will only recommend solutions based on your exact needs – we have no preferred vendors and there are no hidden costs.

Our services can be delivered at a range of levels depending on your need.

FAST, FLEXIBLE AND EFFICIENT CLOUD INFRASTRUCTURE SERVICES

GAINING ACCESS TO COST-EFFECTIVE CLOUD INFRASTRUCTURE THAT'S RIGHT FOR YOUR NEEDS – AND FINDING THE RIGHT SKILLS TO MAINTAIN AND OPTIMISE YOUR ENVIRONMENTS – CAN OFTEN BE A CHALLENGE. OUR TEAM OF EXPERTS CAN HELP MANAGE YOUR ENTIRE CLOUD JOURNEY, PROVIDING EVERYTHING YOU NEED TO SUCCEED.

Whatever your goals, we offer a range of capabilities that can be tailored to your requirements.

A typical work package may include:

- A cloud services assessment – where we work with you closely to audit your current cloud environment
- Designing and deploying your cloud infrastructure – including cloud strategy creation, service design and deployment across all major cloud vendors
- Service management and operational support – based on the latest cloud infrastructure best practice
- Delivering operational efficiencies – focusing on delivering Infrastructure as Code (IaC)
- Securing your environment – using unique security controls for each network, including ongoing security updates and event management

THE RIGHT APPROACH, AND THE RIGHT TECHNOLOGY, DEPENDS ON YOU
