

# INTRODUCING IMPULSE SCHOOL ADMISSIONS PORTAL

Take full control of your internal processes by using our powerful new tool for your admissions rounds data – **School Admissions Portal**.

Including all the user-friendly features you would expect from a CACI product, this Portal allows you to better manage your admissions rounds - whether phased or in year- by making the process more user-friendly and easier to complete.

The Portal allows bespoke user access that is tailored to your specific Local Authority and provides clear dashboards for your users. This means that, at a glance, your team will see which schools still currently have places available, as well as any other relevant data.

When a matter of a few hours can decide whether a child gets a school place or not, we have created functionality that updates in real-time allowing you to quickly react to the changing situation.

Lastly, the system has a defined timeline that will ensure the process adheres to local and national timeframes, so that you will never be caught out by a deadline again.

## FOR LOCAL AUTHORITIES

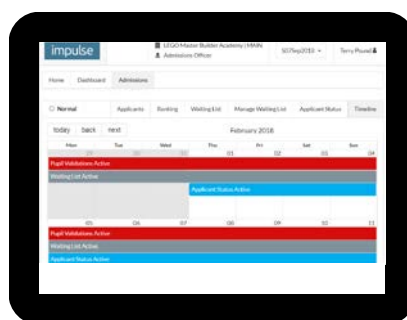

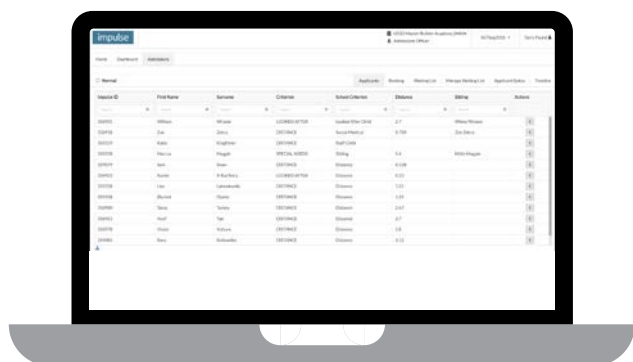

The Portal provides a flexible and comprehensive mechanism to:

- manage the admissions process accurately & efficiently
- handle preferences between Local Authorities and Schools
- provide quick allocation of school places
- reduce administrative workload by using a single database
- have a real-time overview of the admissions round status

## FOR SCHOOLS

If your school manages its own admissions, this system will enable you to:

- view waiting lists, apply ranking and make offers to pupils that require a place at the school
- define local criteria that admission applications can be ranked against
- have full administrative control of your school's admissions process
