

**InView: The
data platform
that's levelling
up the NHS**

InView

Activate your data for strategy, operational planning and ICS collaboration

Your NHS organisation is under pressure to deliver meaningful business intelligence that directly helps you deliver better patient care, improves efficiency and supports collaboration as well as providing accurate reporting for compliance.

Complete, current, accurate and integrated data holds the key to the trusted insight you need every day. With InView, you can unlock the decision-making potential of all your care data, from within your organisation and across the Integrated Care System.

InView from CACI brings you:

Consistent values

for decision-making, financial measurement and forecasting, as well as for information-sharing between Trusts

Time-critical decision-making

at the point of need, receive real-time data updates to share between Trusts

ICS collaboration

with secure integration for data sharing and analysis

Optimal efficiency

through automated processes and reporting, so your analysts can concentrate on strategic activities

Customisation for specific needs

using local extensions and delivering analytics through your tools of choice

Capacity

to store and access more data than ever before, so you can base decision-making on as much governed quality as possible

Data compliance, data quality and data security

rigorous and proven best practice

Torbay and South Devon
NHS Foundation Trust

Torbay and South Devon NHS Foundation Trust implemented the latest version of the InView data platform. It brings together feeds from their in-patient, outpatient, critical care, the maternity system, neo-natal, paediatric, community and extended data (from InfoFlex) that adds richness and detail to patient records – for example, information from GP discharge letters.

An accessible solution for Trusts under pressure

InView is an out-of-the-box, modular solution purpose-built for the NHS. We've designed it for rapid implementation, integration and deployment by our specialist team, so you can put your data to work rapidly. It gives you all the data capability you need today and tomorrow.

Affordable and self-sufficient

We'll work with your team to equip them with the skills they need to modify and augment the solution as your Trust's needs change. Our InView approach is about empowerment: your team can access data, build reports and develop customisations independently (or with light-touch support from CACI's experts).

Inbuilt updates and expert support on demand

InView content is maintained as part of your InView subscription. We receive NHS change notifications directly and build updates into core product releases ahead of deadlines to ensure compliance always. Our technical team has years of experience working with NHS Trusts and is on hand to advise and support you when needed.

Structured and robust solution design to address specific NHS Trust priorities

InView's core capabilities

Statutory features maintained and automated

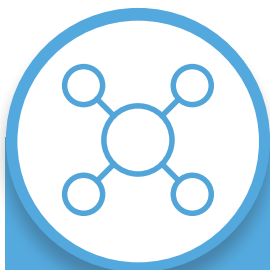

Solid design using NHS terminology and logic

Rules incorporated at acquisition, processing & output stages

Toolset Agnostic presents data to any tool

Proprietary & structured approach to project delivery

CACI to empower Trust staff to be self-sufficient

Experienced and dedicated Solutions Team

Robust post implementation support procedures

Semantic Layer providing governed data access

Partitioned data for secure information sharing

Flexible to host in a secure cloud or on premise environment

Access to CACI's dedicated and experienced Technical Team

Evolve and adapt with InView

We're committed to continued investment and ongoing adaptation of InView to make sure it's the leading data platform for NHS Trusts today and into the future. To support the ongoing changes to the new ICS structure introduced by the Health and Care Act, future investments to update InView will be implemented to enhance data-sharing, forecasting and benchmarking, with seamless integration into the upcoming Federated Data Platform (FDP). Planned Cloud data architecture will support patient pathway analytics and population planning, including real-time data, demographic and other external datasets for a full view of the trends and social behaviours that will shape patient outcomes.

CACI is a long-standing and proven partner to NHS Trusts

We are proud to have provided a range of services to over 150 NHS customers across Acute, Mental Health and Community settings.

Our breath of experience working across the NHS means we have a deep understanding of Trusts' processes, constraints and day-to-day pressures. We harness this knowledge and experience to shape the InView data platform solution so it has a direct impact on improving patient outcomes within your Trust.
